**HACCP INTERNATIONAL  
 CERTIFIED ANTIMICROBIAL  
 CEMENTITIOUS POLYURETHANE**

Flowcrete's HACCP International certified cementitious polyurethane flooring systems have been evaluated in accordance with ISO 22196 and third party testing methods for physical, chemical and microbiological food safety risks and classified as food-safe for use in wet & dry processing areas.

 Contains a silver-ion antimicrobial, Polygiene®

 Positively textured profile to minimise slip risks

 Allows safe transmission of water vapour from the slab

 Protects against chemicals, fats, hot oils, sugar and acids

 Resistant to intermittent temperatures of up to 120°C

 Minimal surface joints ensure the floor is easy to clean
