FLAKE BLENDS

DECORATIVE RESIN

FLOORING SYSTEMS

It's a well known fact that after walls, floors represent the largest component in an interior design scheme. In this way, they offer an excellent platform to make a bold statement underfoot.

In order to deliver the wow-factor in any commercial environment, there are a number of key factors to consider including decorative features like colour, texture and pattern as well as performance benefits including chemical, wear, impact, abrasion and slip resistance.

Flowcrete Australia's range of decorative, flaked resin floor finishes are ideally suited to modern contemporary environments providing a shimmering, stylish aesthetic. Fast-track methyl methacrylate options are available to satisfy tight construction schedules, curing in as little as two hours.

# FLAKE BLENDS
