DECKSHIELD CAR PARK DECK COATING SYSTEMS

Flowcrete Australia understand that first impressions count, and because the car park is the first point of contact for visitors to virtually any site, make sure you create great impressions with our colourful car park coating system, Deckshield. Our car park deck coating solutions are designed to provide:

Excellent resistance against chemicals, oils and acids

Light reflectant appearance to improve aesthetics

Crack-bridging and waterproofing solutions

Positively textured profiles to minimise slip hazards

Seamless, hygienic and easy to clean finish

A low VOC and low odour solution

CORRECT CAR PARK COATINGS SPECIFICATION

Although often underestimated, the correct specification of waterproofing and surfacing materials is critical to delivering a long-term, structurally protected and safe facility for car park operators and vehicle owners.

The most suitable deck coating materials will largely depend on where within the multi-level or underground parking facility they are to be installed as well as the conditions to which the material will be subjected.

Aesthetic requirements

Weather conditions

UV radiation and sunlight exposure

Anticipated structural movement

Abrasion and wear conditions

Chemical, oil and petrol exposure

Existing substrate condition

Expected service life and durability requirements

Drainage requirements

Internal decks

External decks

Turning circles

Ramps

Driveways

Entrances

Stairways

Service corridors
